Starting Kafka

How to run Kafka on different platforms?

Now that we have learned Kafka's fundamentals, it is time for us to start Kafka before we can get our hands dirty with Kafka CLI.

There are several ways to start Kafka, and we will provide instructions for the most popular ones, including instructions with and without Zookeeper:

[Starting Kafka with Conduktor](#) **(Mac, Windows & Linux) - fastest & easiest setup**

[MacOS](#)

[Linux](#)

[Windows](#)

[Docker (platform agnostic](#))
